Washington, PA- West Penn Wire has recently expanded its already extensive Category Cable breadth to now include Category 7 S/FTP Twisted Pair cables.

Our quality cables are available in riser and plenum types, and include: Category 7 S/FTP CMP – Part Number ***254247F.***

To optimize your installation, we also provide a wide range of plugs, jacks, patch panels and assemblies. Note: There are no standards for Category 7 Connectivity.

Please reference the following part numbers: Modular Plugs -CN-MFP8 (10G Rated), RJ45 Jacks -KJS458MT-C6AC (10G Rated, MT Series), Patch Panels- 24458S-C6A & 48458S-C6A (24 & 48 Port Shielded), Assemblies- C6AS-314cc-xxFB (10G Rated)

This cable is ideal for 4K resolution video because the signal delivers a superior performance with high bandwidth applications. The shielding of the 4 (four) twisted pairs improves the noise resistance within the cables.

To learn more please visit WestPennWire.com or email us at Sales@westpennwire.com, 800-245-4964.

Founded in 1971, West Penn Wire designs and manufactures wires, cables, harnesses and related products for small, mid-size and Fortune 500 companies worldwide as well as higher education, healthcare and government organizations, and houses of worship.
