

A Whole New Breed of Emergency Communication

**Unify and Simplify Customers' Emergency Communication
through IP based ToolVox®**

Simple to install, set up and use. Come to ASIS Booth #3457 to see for yourself. Learn how to meet your customers' emergency communication needs and budget by preserving previously installed equipment and allowing for future expansion.

ToolVox®, Code Blue's innovative Unified ECS (Emergency Communications Systems) will equip your customer to:

- Set-up, manage and run
 - Mass Notification Systems (simple or complex)
 - Event Management Systems (including evidentiary history)
 - Unit Programming and Diagnostics (a full suite)
- Integrate
 - Authentic IP Communications
 - 3rd party and disparate video, audio and sensor technologies
- Enable existing analog systems to behave like IP systems

Code Blue pioneered blue light emergency phones 20 years ago and continues innovating with the development of emergency communication systems.

There's a lot more that's new at Code Blue that can help you help your customer. Stop by Booth #3457 to learn more.
