April 7-10, 2014
Las Vegas Convention Center
3150 Paradise Road
Las Vegas, NV 89109

Visit Kramer & Sierra Video in **Booth SL3825** to see our exciting products, including the following featured models below:

[VP-773](#)

8-Input ProScale™ Digital Presentation Scaler/Switcher

The VP-773 incorporates many technology advancements. The VP-773 has the ability to set an EDID for each input of the unit, ensuring connected sources will send the best signal possible to match the display. The VP-773 also includes a unique Emergency Alert feature that will allow any video screen connected to a VP-773 to instantly display an alert message. Important campus wide (educational or corporate) safety messages can be delivered quickly and effectively. The VP-773 also has superior scaling quality, ultra-fast glitch-free switching and 8 inputs including 4 HDMI, 1 DisplayPort, 2 computer graphics video and 1 composite video and 3 simultaneously active outputs, 2 HDMI along with 1 HDBaseT.

VP-794

8-Input Universal Live Event Scaler/Switcher with Edge-Blending & Warp Processing

The VP-794 is a high-performance scaler/switcher with edge-blending & warp processing developed specifically for multiple screen applications. It scales the incoming signal, processes the image through the use of HQV processing technology and provides professional grade edge-blending, flexible warping control and comprehensive geometry correction. The unit can output the signal as a 3G HD-SDI, DVI/HDMI or computer graphics video signal along with S/PDIF audio.

SIERRA VIDEO

SMP-XX Multi-viewer Small Modular Platform Series

The Small Modular Platform (SMP-XX) Series is a high quality, innovative Multi-viewer designed for the serious AV and broadcast user. The SMP-RX features an integrated SDI router providing a highly powerful and capable device for small installations. These high resolution, multi-format devices provide considerable flexibility having full audio support, browser configuration and control, together with sophisticated alarms reporting. The SMP-XX replaces the SM-XX with much more modularity.
