

THE BEST THING TO HAPPEN TO YOUR COMPANY SINCE YOU.

HOW IT WORKS

STEP 1

Answer a few questions.

Okay, more than a few (120 to be exact – don't worry, it's multiple choice and only takes about 30 minutes, even for "C" students...)

STEP 2

See how you stack up.

Our patent-pending algorithm will tell you how your company's valuation would likely compare to your peers, and it will identify critical risks you need to address prior to talking with investors or buyers.

STEP 3

See your prioritized issues list.

CoPilot's algorithm delivers a prioritized list of issues and risks for you to address – some you might have expected, and likely some that are surprises.

STEP 4

Set a plan, get to work.

We have your back. For each issue on your list, we will give you several potential solutions you can utilize, so you can get started right away.
