Intelix Builds Upon FLX-Series Technology

FLX-44 4x4 HDMI matrix features HDMI and HDBaseT outputs with analog audio outputs

COLORADO SPRINGS, Colorado—January 2, 2014—Liberty AV Solutions announced the immediate availability of the latest Intelix four input by four output HDMI/HDBaseT matrix, FLX-44.

The new FLX-44 features four HDMI inputs and four HDBaseT outputs with mirrored HDMI ports on outputs 1 and 2. The FLX-44 includes HDBaseT transmission chips to easily reach 70 meters (230 feet) over a single Category 6 or greater cable, and includes PoE (Power over Ethernet) to power the remote extender, such as the DIGI-HD60C-R. The FLX-44 has the bandwidth to allow Deep Color, full 3D, and up to 7.1 multichannel audio to be routed to any output. The compatible Intelix HDBaseT receivers are DIGI-HD70-R, DIGI-HD60C-R, and DIGI-HDE-R.

The FLX-44 can be controlled via the front panel, local or remote infrared (IR), RS232, Ethernet, or via a web browser. The FLX-44 supports bidirectional wideband IR, which allows the matrix to pass IR signals from the matrix to the display and/or vice versa. Each output supports RS232 tunneling through the HDBaseT extender. RS232 commands to remote displays can also be embedded in the control stream through the matrix from both the RS232 and Ethernet control ports, which will reduce the number of serial ports required for the control system. The extensive variety of control options makes the FLX-44 an easily accessible and extremely flexible matrix for any control system.

Each output of the FLX-44 also features analog audio outputs to feed the audio stream to audio amplifiers or DSPs. Each input of the matrix has the ability to have the HDCP compliance flag turned off, which will allow a non-HDCP encrypted signal to pass clearly to a video conferencing system. The FLX-44 takes up a single rack unit, saving valuable real estate in an equipment rack.

The FLX-44 is in stock and now shipping from authorized Liberty AV Solutions/Intelix dealers across North America.

About Liberty AV Solutions

Liberty AV Solutions is recognized as a leading supplier of audio-visual integration products, including industry-leading digital solutions. Liberty is headquartered in Colorado Springs, Colorado, and operates offices in Colorado, Arizona, North Carolina, and Wisconsin. Liberty remains focused on customer service and education while continuing to provide the broadest range of professional AV products available. Liberty AV Solutions is a subsidiary of WESCO Distribution, Inc., a publicly traded Fortune 500 holding company headquartered in Pittsburgh, Pennsylvania.
