

Atlas Sound

**Announces Atlas A-Line Speakers
Now Available in Europe**

February 4th, 2014 Phoenix, AZ - Atlas Sound, the leader in commercial audio solutions for over 80 years, will be showcasing for the first time in Europe, its line of line array speakers sold and marketed under the Atlas A-line Acoustics brand at the 2014 ISE show in February.

EMMA System

Atlas A-Line Acoustics has developed an exemplary line of products ideally suited for a diverse variety of venues including arenas, amphitheaters, parks, nightclubs, and houses of worship. The company holds multiple patents including the innovative EZAL rigging system, which allows the angle adjustment of individual line array speaker cabinets while the speakers are flown or ground stacked under load.

An extensive product lineup including the ultra-high output AL123 large format system and matching subwoofers, "Emma" series modular install and portable models, "Elijah" ultra high quality portable line array systems and "Eli" small venue line array systems will be manufactured in Atlas' state of the art multi-fab facility in Monroe, WI, USA.

"This is the perfect time to be delivering our line array speakers to the European market", said International Sales Manager Mike Abernathy. "In 2012 we were new to the line array market and the acquisition of A-Line Acoustics enabled us to jump ahead and get us in the game. The line array market is growing, our EMMA, ELIJAH, and ELI systems are ideal for fixed or portable installations and with the release in the coming months of the AL123 we now can offer our customers a solution for any type of installation from House of Worship to large arena or auditorium."

See all of these and other new products from Atlas Sound and the Mitek Communications Group at the Integrated Systems Europe Show in Amsterdam, NL February 4th-6th, 2014 in booth 10-R144.
