FOR IMMEDIATE RELEASE

## Chief is Shipping a New Angle on Installation

*Multi-directional mounts provide more installer-friendly options for new applications*

Eden Prairie, Minn., USA (FEBRUARY 2014) - [www.chiefmfg.com](http://www.chiefmfg.com) - Chief, an industry leader in AV mounting solutions, is now shipping Fusion® Series Multi-Directional Ceiling Mounts to help meet the needs of digital display installations that require 360 degree viewing capability from a single column drop.

The mounts come in triple- and quad-display options while keeping the Fusion single ceiling mount features installers appreciate:

- Centris® technology provides a continuous range of fingertip tilt from +5 to -20 degrees with four set locking points to eliminate guesswork when adjusting multiple screens\*
- Compatible with traditional 1.5" NPT and Chief pin-connection CPA ceiling plates and column systems (sold separately)
- Compatible with most displays 32-60"
- Tool-free screen engagement to secure displays with optional padlock security

The multi-directional adapter can be ordered as an accessory without Fusion mounts to allow for integration of different mount heads.

Start seeing installations differently with Chief [LCM3U](#) and [LCM4U](#) Fusion multi-directional ceiling mounts. Customize your solution with the many Fusion accessories that also work across the [ceiling, cart and bolt-down](#) solutions. More on the full Fusion series can be found at the [Chief Fusion](#) web page.

\*Larger screens may not allow full range of tilt.
