FOR IMMEDIATE RELEASE:

Queensland University CUBE wins DSE Apex Award with tvONE's CORIOmaster

ERLANGER, KY, March 3, 2014 - tvONE (www.tvone.com), a leading designer and manufacturer of cutting-edge video and multimedia processing equipment, is pleased to announce that the Queensland University of Technology's (QUT), The Cube project, featuring tvONE's CORIOmaster, has been named a 2014 Digital Signage Expo® (DSE®) Apex Awards winner in the Education and Healthcare category.

The Apex Awards honor innovation in the deployment of technology in the global digital signage, interactive technology and digital place-based media industries. The QUT project was presented with the Gold Award, the highest honor, for the world's largest interactive multi-touch installation known as "The Cube".

For this project, tvONE supplied 3 CORIOmaster's to drive 12 edge-blended Panasonic projector displays. The CORIOmaster's provided ultimate flexibility, as they allowed the ability to send any source to any combination of screens. An independent, interactive window is available for each source PC, which is mapped to a single output window for its respective display device. When projected all windows are blended into a single panorama.

tvONE's CORIOmaster, offers a new, more efficient approach to building video systems. Using tvONE's latest CORIO®3 technology, it gives the user access to new levels of video processing power to achieve new heights of creative and dynamic video displays. All this is possible in one 4RU chassis.

To learn more about this installation, please visit <http://www.thecube.qut.edu.au/>

About tvONE

A subsidiary of Nortek, Inc., tvONE is a world class solutions provider specializing in video conversion and AV signal distribution. Headquartered in Erlanger, Kentucky, United States, with offices in Europe, USA, Taiwan, China and Latin America, tvONE provides a complete line-up of products and services for the professional AV and broadcast video markets. Following the global merger of tvONE and Magenta Research in July 2013, the new company tvONE now encompasses these two superior brands under one umbrella.

The tvONE brand specializes in video, audio and multimedia processing equipment, based on its proprietary CORIO® video conversion technology. Products include all-in-one system solutions, windowing processors, scan converters, seamless switchers, video scalers, up/down/cross converters, analog-digital converters (SD/HD-SDI, HDMI, DVI), format converters and standard converters.

Magenta Research is the industry-recognized brand for the transmission, switching and flexible distribution of multi-format video, audio and auxiliary signals over fiber and Cat-X cabling. Products include AV extenders, distribution amplifiers and matrix switchers for DVI, HDMI, VGA, and component, composite, s-video, audio, USB, and RS-232 signals.
