InfoComm Booth C 8721

FSR Launches Products to Accommodate Every AV Market Segment at InfoComm 2014

*FSR is Poised to Please with Practical, Cost-Effective Solutions for
Education, Faith-Based, Corporate, Hospitality and Entertainment Applications*

Las Vegas, NV (June 17, 2014) -- FSR returns to InfoComm 2014 with a line-up of product launches that underscores the manufacturer's position as a leading provider of practical, cost-effective and robust AV switching, control and connectivity solutions for the audio/video, education, hospitality, government, and religious markets. The new products are on display alongside FSR's established gear at InfoComm Booth C8721 in the Las Vegas Convention Center.

"FSR has literally dozens of diverse new products to share with attendees at this year's InfoComm," said company president Jan Sandri. "We are delighted to accommodate so many markets by providing practical products that span from simple charging solutions to complex matrix switchers, and everything in-between. We're pleased to help end-users and systems integrators bring projects in on-time, on-budget and on-target."

Amongst its numerous launches, The Company is highlighting its **SS-USB-CHRG** Keystone DC to USB Charger, table configurations to extend the popular **HuddleVU Collaboration System**, the **LITE-IT** enclosure box light, a new series of **Table Boxes**, an **HDBaseT Product** line, **HDMI Matrix Units**, a host of new **Wall Boxes, Floor Box Brackets,** and **7 Retractors** for the popular T6 table series.

NEW SS-USB-CHRG snap in USB charger

FSR rounds out its comprehensive line of charging solutions for iPhone®, iPad®, Android or any smart device with the new **SS-USB-CHRG Keystone DC to USB Charger**. The Charger incorporates the necessary firmware to communicate with any device and provide the correct charging wattage, up to a full 12 watts. The SS-USB-CHRG comes complete with a universal power supply; an optional SS-USB-CHRG PS6 power supply capable of remotely powering up to six units simultaneously from 165 feet via 16AWG cable is available. The slim keystone design means that the SS-USB-CHRG can be easily mounted in any of FSR's Intelligent Plate Solutions (IPS) wall plates, table boxes, floor boxes, and other infrastructure solutions that accept standard keystone snap-ins.

NEW Collaboration Systems and Tables for HuddleVU

FSR continues to expand the highly successful **HuddleVU collaboration systems** with a new line of tables built to accommodate HuddleVU 4, 5 and 6 user configurations. Designed to amaze with built-in AV features, all equipment is plug and play, eliminating the need to load custom applications or software.

The new tables provide collaboration opportunities in any number of environments with both table and counter height versions. The table base provides an area for mounting all HuddleVU equipment, and a vertical rear panel can be finished for open office

environments. The units are available in stock light maple finishes to blend with any décor, but custom finishes are available upon request. Units ship assembled for ease of installation.

NEW LITE-IT Enclosure Box Light

FSR's new **LITE-IT** easily provides lighting in floor, wall and ceiling boxes, or anywhere a work light is needed. This little light securely fastens to any ferrous metal surface via a "rare earth" magnetic mounting. A timed circuit automatically turns LITE-IT off after 75 seconds, and its anti-retrigger circuit prevents it from staying on even if the switch is held continuously. LITE-IT's warm 3000K LED color for eye comfort provides over 12 Lumens of light output (20% more than a standard PR-2 flashlight bulb), and its super-efficient wide angle dual LED's furnish a uniform lighting pattern with uniform brightness to very end of battery life. High-quality alkaline batteries are included and pre-installed and provide 4+ years of typical usage from a single pair of batteries (Based on 2 operations per day, 5 days per week, 52 weeks per year).

NEW Table Boxes

Renowned in the industry for elegant and functional table boxes, FSR is adding a line of **DIGITAL models to the T3 series, an all new IPS Flexible unit, and two new additions specifically designed for BOSE speakers.**

NEW HDBaseT Product Line

Ready to ship FSR's new **HDBaseT** line offers a complete series that runs from Matrix switchers to extenders. FSR's **HDBaseT** devices handle video resolutions up to 1080p and 4K x 2K (3840 x 2160 @30Hz) sending Video, Audio, Control (IR & RS-232), POE (802.11af), and Ethernet via 1 CAT-6A Shielded Cable 100 meters.

NEW HDMI Matrix Units

An **HDMI Matrix Unit** strengthens FSR's already durable and reliable Matrix Switcher series.

NEW Wall Boxes

A full complement of **Wall Box units** will be on show for the first time!

NEW Floor Box Brackets for Special Mounting

Also at InfoComm for the first time are FSR's **Floor Box Brackets** for special mounting.

NEW Retractors

Over **7 new models** will be at exhibited to offer customers a varied choice when they need to add one or more **retractors** to the popular T-6 Table Box.

About FSR

FSR, established in 1981, manufactures a wide variety of products for the audio / video, education, hospitality, government, and religious markets, including AV floor, wall, table, and ceiling connectivity boxes, as well as a full line of interfaces, distribution amplifiers, matrix switchers, seamless switchers and CAT-5 solutions.

The company is an Energy Star Partner and complies with the American Recovery and Reinvestment Act of 2009 to demonstrate its deep commitment to preserving the planet. FSR offers live 24/7 technical and sales support

throughout the country from expertly trained technicians and sales representatives. For more information: www.fsrinc.com.
