## Introduces DIRECTOR System Management Software

Innovative Electronic Designs LLC, the world leader in audio and visual paging systems for over 30 years, is proud to announce the release of IED DIRECTOR software. DIRECTOR features an easily accessible overview of an entire system's status and allows for easy system operation through a facility specific customizable GUI.

IED DIRECTOR is the ideal addition to a GLOBALCOM<sup>®</sup> system especially in complex facilities like airports, public transportation systems, industrial campuses, or retail centers. Features that are accessible through the DIRECTOR program include:

- Provides Overall System Status View
- Fully Customized GUI Allows Easy System Operation
- Select BGM Sources and Adjust Levels Locally or Globally
- Launch Announcements or Events
- Monitor System Status Across LAN or WAN
- Fully Compatible with New and Existing IED ACS
- Flexible User Access Control
- Integrated System Event Scheduling
- System Status Monitoring Across LAN or WAN

IED DIRECTOR is the latest solution from IED that allows facility directors and other key personnel access and control of their communication system.

"The DIRECTOR software takes our GLOBALCOM platform to the next level", said Vice President of Product & Marketing Development Jody Green. "This software can be customized for any facility and for any purpose that is going to help the users work within the platform as easily as possible. Having the ability to overlay your building in the facility, build out the zones, and monitor and control it all make it the optimum choice for a variety of installations. With GLOBALCOM's scalability, facilities of all sizes can utilize DIRECTOR to manage their mass notification and emergency communications systems. The software is extremely versatile and intuitive and the multi-tiered security allows flexible use for anyone that needs to use the system."

See all of the new products from Innovative Electronic Designs and the Mitek Communications Group at the InfoComm Expo in Las Vegas, NV June 18th-20th, 2014 in booth #C10508.

#### About Innovative Electronic Designs

IED is in the business of connecting people. Its communication systems are used worldwide to bring people together, keep them safe, and make their lives easier. Whether they are connecting flights in the world's busiest airports, paging the parents of a lost child, quickly evacuating a building during an emergency, or countless other situations, IED stands by its systems as the most reliable and trusted systems in the market today.
