

FSR Expands Infrastructure Line of Wall Box Solutions with Introduction of PWB-353

Open face design facilitates quick access to cables

Woodland Park, NJ (August 27, 2014) – [FSR](#), leading manufacturer of a wide variety of products for the audio/video, education, hospitality, government, and religious markets, continues to expand its infrastructure line of Wall Box solutions with the introduction of the PWB-353 Wall Box unit. Featuring an open face design with a white interior and white extended trim ring, rather than a closed cover, this model facilitates quick access to cables and connectors without cover removal.

[The PWB-353](#) features multiple knockouts for power and openings for up to six single IPS connector plates. At 3-inches deep, it is designed for use in 3-inch or 4-inch stud walls. The extended trim ring provides a clean appearance while covering rough cuts in the drywall created during installation.

*"We are always pleased to be able to offer industry professionals working in the audio/video markets cost-effective solutions that help make their jobs easier," said Jan Sandri, FSR president. "With our new PWB-353 Wall Box unit, we are confident that we are doing just that. The PWB-353 offers, among many other things, an open face design that lends itself well to quick and easy access to cables and connectors. Users can even add LITE-IT to easily provide lighting." FSR's new award-winning **LITE-IT** securely fastens to any ferrous metal surface and easily provides lighting in floor, wall and ceiling boxes, or anywhere a work light is needed.*

Key features of the PWB-353 Wall Box include: A rugged 16 gauge steel back box, simple installation features, quick access to cables and connectors, multiple knockouts in a variety of sizes and included hardware.

The PWB-353 is shipping now. As always, all FSR products are made of durable materials in the USA.

About FSR

FSR, established in 1981, manufactures a wide variety of signal management and infrastructure solutions for the audio / video, datacom, education, hospitality, government, and religious markets, including floor, wall, table, and ceiling connectivity boxes, as well as a full line of interfaces, distribution amplifiers, matrix switchers, seamless switchers and HDBaseT & CAT-X signal delivery solutions.

The company is an Energy Star Partner and complies with the American Recovery and Reinvestment Act of 2009 to demonstrate its deep commitment to preserving the planet. FSR offers live 24/7 technical and sales support throughout the country from expertly trained technicians and sales representatives. For more information: www.fsrinc.com.
