FOR IMMEDIATE RELEASE:

tvONE CORIOmax Products Extend Signals Beyond Expectations

New AutoDetect Mode Automatically Configures Outputs for up to 500 feet

ERLANGER, KY, October 29, 2014 - tvONE (www.tvone.com), a leading designer and manufacturer of cutting-edge video and multimedia processing equipment, announced today a revolutionary advance to its CORIOmax HDBaseT Output Modules. Now CORIOmaster, CORIOmaster mini, CORIOmatrix and CORIOmatrix mini, when equipped with HDBaseT output modules, can automatically set up to extend HDBaseT 60m, 100m or 130m depending on the receiver used.

The HDBaseT Output Module is a 2-port, HDCP compliant module with scaling that allows the extension of high resolution digital video as far as 500 feet (130m) over a standard Cat.5e/6 cable. The module can now auto-detect the receiver connected to the system and configure itself without user intervention. tvONE provides the 1T-CT-642 for 60m HDBaseT lite, the Magenta Research HD-ONE DX/LX for 100m HDBaseT and the Magenta Research HD-ONE LX/DX 500 for 130m HDBaseT extended mode.

The CORIOmax family of high quality, modular based all-in-one systems provides the ultimate in flexibility. The CORIOmaster, CORIOmaster mini, CORIOmatrix and CORIOmatrix mini use modular AV slots to determine the signal format as well as the number of I/O's. Sixteen (16) AV slots are available with the CORIOmaster & CORIOmatrix and five (5) slots are available with CORIOmaster mini and CORIOmatrix mini. Each module type is automatically recognized as either an input or output connection. This allows the user considerable flexibility in configuring the unit with their own individual video I/O requirements. This modular approach allows integrators the freedom to specify this product in almost any environment and to accommodate most I/O variables. Modules can be added or changed as needed.

###

About tvONE

A subsidiary of Nortek, Inc., tvONE is a world class solutions provider specializing in video conversion and AV signal distribution. Headquartered in Erlanger, Kentucky, United States, with offices in Europe, USA, Taiwan, China and Latin America, tvONE provides a complete line-up of products and services for the professional AV and broadcast video markets. Following the global merger of tvONE and Magenta Research in July 2013, the new company tvONE now encompasses these two superior brands under one umbrella.

The tvONE brand specializes in video, audio and multimedia processing equipment, based on its proprietary CORIO® video conversion technology. Products include all-in-one system solutions, windowing processors, scan converters, seamless switchers, video scalers, up/down/cross converters, analog-digital converters (SD/HD-SDI, HDMI, DVI), format converters and standard converters.

Magenta Research is the industry-recognized brand for the transmission, switching and flexible distribution of multi-format video, audio and auxiliary signals over fiber and Cat-X cabling. Products include AV extenders, distribution amplifiers and matrix switchers for DVI, HDMI, VGA, and component, composite, s-video, audio, USB, and RS-232 signals.
