# FSR Introduces Flex Control Builder
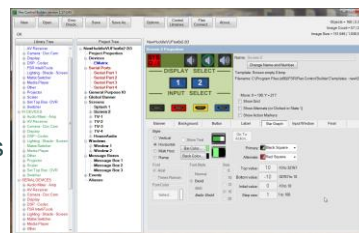

## New Software Application To Configure Flex-LT Control System Panels

Woodland Park, NJ  (January 15, 2015) — FSR, a leading manufacturer of a wide variety of infrastructure products for the audio/video, education, hospitality, government, and religious markets, has introduced its Flex Control Builder (FCB),  a new software application used to configure FLEX-LT control system panels. Jan Sandri, president of FSR, made the announcement from the company's Woodland Park, NJ headquarters.

The company's popular FLEX-LT is a wall or table box mounted control system intended for use in classrooms, meeting rooms, lecture halls, conference rooms, boardrooms and more. The FCB allows users an easy way to configure the FLEX-LT control system panels (there are several different panel models). With a host of new features, the FCB is backwards compatible with legacy projects and has the ability to create custom graphics for screens and buttons. The new FCB offers users the freedom of button and text position & size and offers the ability to create custom text.

*"The Flex Control Builder is an inexpensive, yet extremely capable control product that is easy to program, allowing it to be completely customized to the requirements of users who are not programmers and have minimal training," says Sandri. "The FCB incorporates many new features and an updated look and feel while maintaining full backwards compatibility with existing projects."*

Providing users with complete project view At-A-Glance, FSR's new FCB also offers dialer support with visual feedback, built-in project diagnostic and resource monitoring, multiple bar graph support and now allows easy copy and pasting of screen features from existing projects. With a single click, users can receive updates to FCB and library files from the FSR Website. In addition, FCBs add support for IR pass through with Flex firmware version 2.11 or higher.

## **About FSR**

FSR, established in 1981, manufactures a wide variety of signal management and infrastructure solutions for the audio / video, datacom, education, hospitality, government, and religious markets, including floor, wall, table, and ceiling connectivity boxes, as well as a full line of interfaces, distribution amplifiers, matrix switchers, seamless switchers and HDBaseT & CAT-X signal delivery solutions.

The company is an Energy Star Partner and complies with the American Recovery and Reinvestment Act of 2009 to demonstrate its deep commitment to preserving the planet.
