Announcing “Stealth Patio Theater”

Large-Screen Outdoor Cinematic Entertainment Solutions

155” Motorized Stealth Patio Theater

Mount Vernon, WA – Stealth Acoustics’ new Stealth Patio Theater is a complete large-screen outdoor cinematic entertainment solution that doubles as a scalable digital signage display for venues ranging from nightclubs and hotels to businesses and educational institutions, shopping centers and theme parks.

Designed for continuous outdoor use and storage in three standard sizes, Stealth Patio Theater’s mammoth 16:9 ultra-bright LED screens produce vibrant,

colorful, full-motion images even in broad daylight. Included StingRay™ IP68-rated loudspeakers and subwoofers powered by Stealth’s high-current amplification complement Stealth Patio Theater with environmentally durable, theater-quality surround sound.

Compatible with all major control systems, Stealth Patio Theater is highly scalable and flexible with a 1080p processor capable of playing seven standard HDMI HDCP sources, streaming media and A/V from most digital media and signage players. With its video, audio and PC inputs, Stealth Patio Theater is also a perfect outdoor presentation system that can display live camera video, PowerPoint or recorded video production content.

Stealth Patio Theater’s marine-grade above-ground cabinets are attractive and functional with motorized lifts that safely retract the video display for storage. Optional custom subterranean vaults can match existing outdoor décor or disappear into the environment.

Stealth Acoustics VP Steve Olszewski said, “We designed Stealth Patio Theater with the performance of a high-quality entertainment system and the versatility to double as a digital signage and business presentation solution. We’re excited about its potential in the professional and commercial marketplace.”

Stealth Acoustics is a globally-focused US manufacturer of uniquely capable entertainment solutions and products including Patio Theater, award-winning totally invisible loudspeakers and subwoofers, custom art-speakers and power amplifiers.

Visit Stealth Acoustics in booth #979 at Infocomm, Orlando, 17-19 June, 2015 or www.stealthacoustics.com for more information.
