

FOR IMMEDIATE RELEASE

SynAudCon Presents Sound System Design And OptEQ Seminars In Asia

Greenville IN, USA (August 2015) - SynAudCon has announced three seminars that will be presented in Asia. The Singapore (August 20-21) and Bangkok (August 24-26) seminars will cover sound system design principles. OptEQ will be presented in Shenzhen on August 31 – September 1.

The sound system design seminars will present a logical, intuitive, and comprehensive system design approach beginning with analysis of a room's acoustics. From this information, the attendees will learn how to select and place loudspeakers to achieve speech intelligibility and music clarity.

Other topics include how to get the most SPL from a loudspeaker – including what size amplifier to use – and how to use computer room modeling to speed up the design process. Instructor Pat Brown uses demonstrations and analogies to present the principles in a practical, visual, and understandable way. The

course materials also include SynAudCon's "Audio Click-Rule" software program. The three-day Bangkok seminars will provide more in-depth coverage.

SynAudCon's OptEQ seminar is a two-day seminar that offers attendees a comprehensive approach to sound system tuning that combines contemporary and legacy design and equalization practices into a logical, accurate, repeatable process.

OptEQ is a three-step approach to sound system optimization. The first step concerns the loudspeaker, the second its placement in the room, and the third is the room itself. Step 1 is direct field optimization that produces reference response for the loudspeaker that confirms it is functioning as designed and to its fullest potential. Step 2 adds an equalization layer to compensate for anomalies caused by boundaries around the loudspeaker. Step 3 addresses room resonances using a dual domain approach.

All seminars will be presented by [SynAudCon](#) owner and instructor Pat Brown. To register for the seminars, please visit the following websites: Singapore seminar, [Systems Integration Asia](#); Thailand seminar visit [Fuzion Far East](#); and Shenzhen seminar, [EZ Pro International](#) for more information.
