

## DPA Series Network Mixer Amplifiers

AtlasIED, the leader in commercial audio solutions for over 80 years, is proud to announce the release of the new DPA Series network mixer amplifiers. The DPA Series is the culmination of three years of research and development with the result being a family of high-powered multi-channel amplifiers featuring integrated digital signal processing and network control.

DPA Series provides four output channel amplifiers with three models delivering up to 600-watts per channels. Each model can be used in 2-channel 70.7V, 4-channel 4 $\Omega$ , or 3-channel 70.7V and 4 $\Omega$  configurations making them incredibly flexible for a variety of installation types. Internal digital signal processing allows each model to be customized to maximize its performance. The DSP software is embedded in the amplifier and is accessible via a web user interface. DSP adjustments include I/O routing, high and low pass filters, EQ, output level adjustment, delay, and limiter. Additionally, input mute for both audio sense and contact closure, level control link assignments, and port assignment and output impedance can be configured in the software. Site manager software is available that allows network administrators to see all DPA amplifiers on the network for easy identification, set-up, and troubleshooting if necessary.

Available Models	DPA602	DPA1202	DPA2402
Channels	4	4	4

Power 70.7V/100V	2 x 300W	2 x 600W	2 x 1200W
Power 4Ω	4 x 150W	4 x 300W	4 x 600W
Power 70.7V/100V & 4Ω	1 x 300W/2 x 150W	1 x 600W/2 x 300W	1 x 1200W/2 x 600W

"At this year's InfoComm show, AtlasIED introduced the DPA Series and the response has been incredible", said John Ivey President of Sales & Marketing, "the DPA Series amplifiers are true game changers; they address real world problems with outstanding function, performance, and price point.

#### About AtlasIED

We are a global electronics manufacturer providing comprehensive audio solutions for commercial business environments. We save organizations time and money with effective use of building communication systems while also helping to maintain a safe work environment with our industry-leading mass notification, life safety, and speech privacy systems. Our technologies seamlessly interface and integrate into existing and future analog and IT based infrastructures. Our systems are used by the largest enterprise businesses such as Fortune 1000 companies, mass transit hubs, health care, education, manufacturing plants, hotels, and large retail chain stores. We also focus on smaller businesses like local coffee shops, bars, restaurants, and houses of worship. With multiple patents and proprietary solutions, AtlasIED is the leader in the commercial audio market.
