Video Scoreboard Announces Latest Multi-Sport Software Release

A 21st Century Scorekeeping System Capable of High-definition, Full-Motion Video

Video Scoreboard™

Mount Vernon, WA – Video Scoreboard (VSB), a division of Dimensional Communications, Inc. announced the availability of its recently updated application-based multi-sport time and scorekeeping solutions. The new applications will reside on all Video Scoreboard systems purchased after November 21st 2016, including the VSB Basic™, VSB Core™ and VSB Pro™ offerings.

According to Video Scoreboard, the new applications for Basketball, Volleyball and

Wrestling provide updated features to enhance game day score and time keeping operations, simplify system setup and usage, all while enhancing security and reliability of the mobility elements of the system.

“We have always brought industry-leading digital features to our VSB systems and our all new application software was rigorously built and hammer-tested by our VSB team from the ground up to anchor what we know works well and to add even more features and reliability.” said Jeremy Vosburgh, software design specialist at VSB. “This is just the beginning of our updated road map towards even more advanced features. We know that it’s all about doing things with VSB that no other scoreboard provider does while focusing on the ultimate reliability of operation that any sports venue requires.”

Video Scoreboard offers affordable solutions previously only available to professional franchises at great expense, from a simple score and timekeeping appliance that can be easily connected to an existing venue display all the way to multi-source live HD video production with cameras, one button media playback, instant replay and slow-motion.

“We looked deeply at what professional sports franchises were doing regarding features, like wireless cameras, whistle integrations and media ingest / playback.” continued Vosburgh. “We then found ways of doing them better, faster and less expensive than previous methods. This is how we bring advanced abilities to a much wider audience of users at affordable prices.”

Featuring the use of both modern control technology and legacy-style connectivity, VSB systems operate from wireless touch control surfaces, fixed control screens or hard-cabled push-button controls, giving the flexibility for a user to engage the system in the manner that makes the most sense for the venue and operators. VSB systems have deep abilities that are designed to be easily configured and used by non-technical people or by operators with vast experience in scorekeeping or media production. This powerful simplicity sets a VSB system apart from traditional systems that require extensive training and skills to operate.

Video Scoreboard is available from select dealers across the US. Contact Video Scoreboard at 360-424-6164 or visit www.videoscoreboard.net for more information.
