

BOSCH
Invented for life

What's new from Bosch Communication Systems at InfoComm 2017?

InfoComm 2017 will be one of our most exciting shows in years! We'll have big news to share, including many new products and technologies from across the Bosch Communications Systems family of brands: Bosch conferencing and public address, Electro-Voice loudspeakers and microphones, RTS intercom systems, and Telex radio dispatch.

In our demo room we will introduce important new additions to the Electro-Voice EV-Innovation and EVID installation-dedicated loudspeaker families, along with two completely new amplifier lines. See you at the show!

Booth #6043 Hall D
Demo Room #W221BC
