Spectrum Introduces New Pivot Workstation

Description: Spectrum designs new workstation with the collaborative classroom in mind.

CHIPPEWA FALLS, WI – Spectrum Industries, Inc., Chippewa Falls, WI based manufacturer, is excited to announce the introduction of the Pivot Workstation. As collaborative learning continues to grow, the need for a mobile, lightweight lectern becomes a necessity. The Pivot Workstation allows the instructor to move to each student group, making learning the center of the classroom.

Configured for any environment, the Pivot Workstation comes in two different sizes, a 36” and a 48”, both offered with the optional cup holder. The whisper-quiet electric lift legs can be operated through a battery pack so you are not tethered to the wall, or through the traditional power cord. A foot rest can also be added to the legs for extra comfort. Locking casters provide for easy mobility. There are also a number of worksurface storage options, including under-surface storage with or without a locking door and a pull-out keyboard tray. A modesty panel can also be added.

“Spectrum is known for high-quality lecterns. The Pivot Workstation fits right into that family, and works very well in that collaborative classroom,” states Ben Jones, National Sales Manager. “We know that instructors are decreasing the amount of lecture time and increasing discussion and group engagement. The Pivot allows the instructor to be the center of that discussion and engagement.”

Spectrum Expressions

The Pivot Workstation can be ordered in the Spectrum Expressions line of laminate and black metal. The Expressions line features dozens of color combinations, which are designed to match our furniture to your room décor. The laminates cover all work surfaces and the matching edge trim provides the appearance of elegant custom-built furniture. And the newest laminate, Chalk White Dry Erase, is perfect for the collaboration setting as users can simply use the workstation itself to brainstorm their ideas. The metal is covered with a powder coat finish that provides a tough, wear-resistant surface to all metal components.

Spectrum Industries is proud that the Pivot Workstation is designed, assembled, and shipped from our factory in Chippewa Falls, WI. It is warranted to be free of all defects in materials and workmanship for 10 years and electrical for 2 years.

About Spectrum Industries, Inc.

Spectrum Industries, Inc. is a provider of innovative, quality instructional furnishing products and services that represent preferred solutions to customer needs. Founded in 1968 and headquartered in Chippewa Falls, Wisconsin, Spectrum has gained a strong reputation for producing quality products in an environmentally responsible manner.
