Kramer’s VS-622DT All-in-One Presentation System Now Shipping

*Ideal for Corporate Meeting Spaces*

Kramer Electronics’ [VS−622DT](#) is an all−in−one 4K@60Hz (4:2:0) presentation system with 6x2 HDMI/HDBaseT™ matrix switching, control gateway, PoE, power amplifier, and Kramer Maestro room automation. The unit reclocks and equalizes the signals and can route any input to the HDMI or the HDBaseT output or to both outputs simultaneously.

HDBaseT signals can be sent up to 328ft (100m) at 4K @60Hz (4:2:0), up to 430ft (130m) at 1080p @60Hz 36bpp, up to 590ft (180m) at 1080p @60Hz 24bpp. The unit also provides power to PoE compatible devices on all HDBaseT outputs.

The VS−622DT is also a control gateway that can send control signals over the Ethernet or HDBaseT line with control ports that include: RS−232, four IR, two GPI/O, and two relays to control a wide variety of AV devices. The VS-622DT can be accessed from auxiliary controllers, such as control keypads, through a Kramer Network connector interface, via Kramer Control and more.
The VS-622DT has a built-in audio power amplifier that provides 120W @70V/100V & 2x60W @4/8Ω with line level output. It also has built-in audio de-embedding. The extracted signals from 2 of the 6 inputs (2 HDBaseT and 4 HDMI) are output through two balanced analog audio outputs. In addition, one of the extracted audio signals can be output to the power amplifier.

Also included in the VS-622DT is Kramer Maestro – a room control automation software offering a customized, easy-to-configure, fully-automated meeting room environment, without requiring any programming. Kramer Maestro enables intuitive configuration of room automation events – a series of actions that occurs when a specific condition, or trigger, is met. Maestro has an extensive range of triggers including scheduling, input/output connectivity, routing, and pressing device buttons.

The actions Maestro can perform are virtually endless due to its dynamic database of device drivers that enable controlling any AV device or room element, from switchers to air conditioners. Now supporting additional I/O ports, Maestro enables automated control over RS-232, Ethernet, GPI/O, relay, and IR. Kramer Maestro also reduces meeting prep time and minimizes the need for human interaction before presentations, resulting in a more reliable experience for all users, every time.

The VS-622DT is a compact form factor that fits in a 1U Rackspace and is ideal for small-to-mid size meeting spaces and conference rooms. The VS-622DT carries a list price of $3,896.00 and is currently in stock in the United States.
