

d&b opens the door to new install possibilities at ISE 2019

Backnang, Germany 20.12.18 - d&b audiotechnik will be at Integrated Systems Europe (ISE) 2019, at RAI Amsterdam from Tuesday 5 to Friday 8 February, exhibiting multiple new products developed for audio system installation and integration.

On stand C210 in Hall 7, the d&b team will introduce d&b's first MILAN network protocol enabled product, the DS20 audio network bridge. In addition d&b will launch the R90 touchscreen remote control for d&b sound installations, present its BIM/Revit information modelling solution for planners, as well as updating visitors on developments in the d&b Soundscape system.

“ISE provides a great opportunity to highlight the advantages of our new developments, as well as to discuss emerging audio industry trends.” says David Claringbold d&b Chief Marketing Officer. “Our team is looking forward to showing visitors what these new tools can help them to achieve.”

Guests heading over to the d&b stand will also find the newest edition to the SL family, the KSL System, which recently had its official launch at NAMM 2019 in California. KSL is the latest loudspeaker system from d&b, designed to deliver all the recognizable performance characteristics of its SL-Series lineage, from broadband directivity control to advanced rigging options. The KSL System is scaled to suit a broad range of installation and mobile applications.

d&b will also be showcasing these new products at ISE's Pro Audio demo rooms E105 and E106. Guests will have the chance to join d&b sessions, including the product listening sessions, Soundscape sessions and the daily news session, where d&b will introduce the R90, and the DS20, with further focus on d&b Soundscape.

All the d&b demo session dates and times for ISE can be found in the [Demo room schedule](#).

Free registration for the show is available by following the [link](#) and using the d&b code 836775.
