

News Release

Belden Innovation Leads to 13 New Product Launches/Line Extensions in Q1 2021

St. Louis, Missouri – March 2, 2021 – Belden Inc. (NYSE: BDC), a leading global supplier of specialty networking solutions, continues to offer its customers more options to manage high density, reduce installation time and safely transmit data *and* power with the new Q1 2021 product launches.

Cable:

- **Belden's Digital Electricity™ (DE) Cable** delivers DE power (up to 2,000W) on the copper pair while sending data via fiber over long distances (up to 2 km). The line expansion now includes indoor and indoor/outdoor 2 mm breakout plenum cables.
- Reduce installation time with Belden's **FiberExpress Hybrid Copper-Fiber Cable line**. The expanded line now includes indoor and indoor/outdoor 2 mm breakout cables, low-smoke zero halogen in aluminum interlocked armor (AIA) and non-armored versions and indoor/outdoor 2 mm/3 mm breakout or distribution plenum cables in AIA versions.
- Enhanced safety and fire protection is now available with **RailTuff™ Fiber Optic Cable**. Specifically designed for raiiside or roadway tunnel station and signaling operations, these reliable cables are built to extend the life of your transportation infrastructure.

Connectivity:

- The new **M12 Power Cordsets & Attachables** from Lumberg Automation are 50% smaller than traditional options, offering effective, safe and reliable solutions, even in the smallest settings.
- Designed and certified to meet the needs of transportation applications, the **M12 X-Code Field Attachable Connectors** protect against mechanical shock, vibration, dust and moisture without compromising performance.
- Extend the use of I/O modules and reliably connect sensor and actuator data with the **M12 T-Splitter**. This new, user-friendly design saves time and assembly costs by offering installation against walls.
- The REVConnect® Connectivity line now includes the **REVConnect 1U48 Patch Panel**, a one-of-a-kind high-density patch panel with 48 ports in a 1U space. It utilizes REVConnect termination technology and is available for Category 5e, 6 and 6A configurations, as well as flat or angled alignments.

Networking & Software:

- The **BAT Controller Virtual** automates the setup of secure VPN connections between industrial sites with just a few mouse clicks. This robust network connectivity is a cost-effective, easy-to-deploy, secure solution to network management.

- The new **BOBCAT High-Port Managed Switch**, with up to 24 ports and various configuration options, is designed to meet rising bandwidth needs. This compact, powerful solution enables more securely connected devices to be on the network.
- The **Hirschmann Operating Systems (HiOS) Software** has been updated to add a brand-agnostic, embedded OPC UA server, providing a universal communication bridge between all levels of automation architecture.
- Belden's newest network management software, **Provize Core**, offers an easy way to supervise your growing number of network devices free of charge.

Alpha Wire:

Alpha Wire's new **Xtra-Guard® Flex TPE** line combines physical toughness and continuous flex performance in one cable for use in rugged environments. Visit <http://www.alphawire.com/Xtra-Guard-TPE> to learn more.

ProSoft:

Inefficiencies can be identified and corrected by using ProSoft's new **QuickServer** units to connect HVAC, security systems and more. They offer protocol conversion between a complete suite of industry-leading building automation protocols. For more details, visit: www.psft.com/DEL.
