Mercury's n.FORM® System Named a Finalist in the
2021 AST Homeland Security Awards Program

October 14, 2021 – Woodbury, NY - Mercury Notifications, the world's leading B2B life safety solutions provider and product manufacturer of the n.FORM® Mass Notification System, is excited to announce it has been named a finalist in American Security Today's 2021 AST Homeland Security Awards program.

This year marks the 6th year for the ASTORS Homeland Security Awards Program which continues to recognize the outstanding innovations of top firms and agencies in the Homeland Security and Public Safety fields.

The Program is the preeminent U.S. Homeland Security Awards Program highlighting the most cutting-edge and forward-thinking security solutions coming onto the market today. Championing the Award Program is American Security Today, a publication committed to providing readers with the information they need to keep our nation safe – one facility, street, and city at a time.

Embracing the importance of providing a true eco-system and emergency notification platform, Mercury Notifications entered the n.FORM® Mass Notification System into the Awards Program. After initial review by the judging committee, Mercury was selected as a finalist for providing a one-stop solution for life-safety communication. Noteworthy capabilities that caught the award committees' attention included n.FORM's ability to provide all of the hardware, software, controls, and fire alarm control panel integration, as well as Mercury's ability to meet codes and standards (NFPA72 and UL2572) specifically set for mass notification systems.

The Award Program will be a prominently featured Special Event on the opening day of the ISC East show, and the event expects to draw thousands of government, security industry and public safety professionals who will convene to meet with experts from over 350 industry-leading innovators, manufacturers and technical reps, at the Northeast's largest physical and IT security trade show to check out the latest in security technologies.

As in previous years, the 2021 ASTORS Awards Program surpassed expectations with a record number of nominations received from industry leaders and government agencies, and winners will be announced during the ISC East show at the Jacob Javits Center in New York City on November 17, 2021.

Of the nomination, Todd Eddy, Chief Sales Officer for Mercury says, “We feel fortunate that our commitment to offering a complete solution for life-safety and emergency communication is being recognized by American Security Today and other top security industry leaders. The importance of having benchmarks for safety within the life-safety ecosystem, like those set by UL for mass notification is critical, and we look forward to helping the industry understand this value.”

About Mercury Notifications

Specializing in life-safety technologies, Mercury Notifications, and their n.FORM® Mass Notification System is a complete, end-to-end, supervised solution that provides the hardware, software, integration, and controls needed for your mass notification and emergency communication systems.

No matter the situation, Mercury Notifications keeps the line of communication open enabling targeted messages via distributed audio, wide area speakers, phones, email, SMS/Text, Twitter, Skype/Teams, desktop alerts, digital signage and more.

As a UL 2572 and UL 864 rated platform, Mercury integrates with Fire Alarm Control Units and provides complete emergency and non-emergency communications by zone, by building, by campus, or over a series of buildings anywhere in the world.

In addition, the company offers a complete suite of cloud-based software that enables building-to-building communication, prioritized messaging, and the ability to address, manage and monitor all your facilities from a single access point. Mercury’s n.FORM® Mass Notification System is made in the USA and the n.FORM® System is installed in millions of square feet around the globe.
